

Assignment – 10

Joining a Table to Itself.

- 1) Write a query that produces all pairs of salespeople who are living in the same city. Exclude combinations of salespeople with themselves as well as duplicate rows with the order reversed.

Query-

```
SELECT
    A.sname AS Salesperson1,
    B.sname AS Salesperson2,
    A.city AS City
FROM
    Salespeople A
INNER JOIN
    Salespeople B ON A.city = B.city
WHERE
    A.snum < B.snum;
```

- 2) Write a query that produces the names and cities of all customers with the same rating as Hoffman.

Query-

```
SELECT cname, city
FROM customers
WHERE rating = (SELECT rating FROM customers WHERE cname = 'Hoffman')
AND cname <> 'Hoffman';
```
