

Assignment –2
Introducing Relational Databases.

1) Which field of the Customers table is the primary key?

Ans- Onum field is primary key of the customers table because Onum field define unique column from customers table .

2) What is the 4th column of the Customers table?

Ans- Cnum is 4th column of the Customers table.

3) What is another word for row? For column?

Ans- Record is another name for row and for column field.

4) Why isn't it possible to see the first five rows of a table?

Ans- SQL tables represent *unordered* sets. So, there is no such thing as the first five rows or last row unless a column explicitly defines the ordering.
